

The easiest way to get to the **Sid Martin Biotechnology Incubator** from the University of Florida campus is to go west (via University Ave, Exit 387 or west on Archer Road, Exit 384) from Gainesville and take I-75 North. At Exit 399 (US 441/Alachua/High Springs), exit via the ramp to US 441 south.

At US 441, turn left at the light, heading south into the town of Alachua.

The Incubator is 2.8 miles from the I-75 Exit. Continue south through the two traffic lights in Alachua. Just as you exit the town of Alachua, you will go over an overpass bridge and the Sid Martin Biotech Incubator will be on your right in Progress Corporate Park.

Look for the entrance to the Progress Corporate Park on the right, identified by a sign. The road is Progress Blvd.

Turn right onto Progress Blvd. The Incubator is on the right. It is a large white building with mint green architectural steel girders on the roof and is identified by its original sign reading "Sid Martin Biotechnology Development Institute."

Progress Corporate Park is located on US 441 in the city of Alachua approximately 10 miles north of Gainesville, Florida. It is conveniently located 5 minutes from Interstate 75.

Take I-75 exit 399 (Alachua/High Springs). At the foot of the exit ramp take US 441 South – you will be going 2.8 miles from this exit. After passing through the city of Alachua you will find yourself on a long downhill grade where 441 goes over a railroad track (which you cannot see).

At the bottom of the hill take your first right onto Progress Blvd. The Park can also be approached by taking US 441 North (13th Street) from Gainesville (see above).

Progress Corporate Park has two entrances off of US 441, one at Progress Drive and one at Innovation Drive.
